Global Health Systems: Comparing Strategies For Delivering Health Systems

Synopsis

Written as a textbook for International health, comparative studies, global health, international affairs, health administration and public health, Global Health Systems helps students to think more deeply about how health care is organized. The friendly writing style engages the learner in understanding how global health systems are interdependent and stresses what one system can learn from the other. The book presents a variety of real life, stimulating examples of what can go wrong at the health system level and practice level with suggestions for preventing future problems. Review questions are included at the end of each chapter summarizing major points and facilitating critical thinking, problem-solving, and informed decision-making particularly when addressing health care, cost, quality, and true access. Instructor Resources: Instructor Manual, PowerPoint Slides, Test Bank

Customer Reviews

I needed it for class, it came used as it was supposed to. No real complaints other than the binding being worn in and marks on the pages

Great buy! I purchased this text for 20% less than I would have at my campus bookstore.

book was in excellent condition!

Love it thank You

An excellent book to read and learn from. It is indeed a great book guide for learning other countries having a universal health care system.

I received the product on time and it is brand new as it was described.
