Age Range: 12 - 18 years

Grade Level: 6 and up

Customer Reviews

What an awesome idea! I love this little topics to share and discuss with students! One of our technology applications teachers shared this with me and my department shared it with the other teachers at the middle schools. I do wish there was a little bit of a cheat sheet to go with it as some of the adults always know the "right" response. :(

Challenging, provocative without being profane. Decent for high schoolers. Well-phrased. Good ice-breakers and short-term activities. Kids will ask to keep doing this but maybe to get out of the harder work; still, they engage.

I think it was a little pricey so gave it 4 stars, but it would have taken me a long time to come up with all the scenarios in the jar. Relevant to today's teens. I will use it a lot.

I like the cyber dilemmas in a jar because it gets kids to thinking about the choices they make. Great

conversation starter as well.

My daughter and I have found it useful. She feels that several situations described resonate with her.
